WEBSITE SECURITY ASSESSMENT

■ Target Information

Website	**google.com**
URL	https://google.com

■ General Information

Status Code	**200**	Response Time	**1.83 sec**
Server	**gws**	Content Type	**text/html; charset=ISO-8859-1**

■ Network & Encryption

HTTPS	**ENABLED ✓**	SSL Certificate	**VALID ✓**
DNS Status	Resolved Successfully ■	IP Address	**172.217.17.46**

■ Security Headers

Header	Status
Clickjacking Protection	**Enabled ✓**
CSP	Missing ✕
HSTS	Missing ✕
MIME Protection	Missing ✕
Privacy Protection	Missing ✕

Security Headers Score: N/A/100

■ Security Assessment

PROTECTION	RISK PROBABILITY	RISK LEVEL
60%	40%	Poor ■

■ Security Recommendations

- Enable HSTS (Strict-Transport-Security) to enforce secure HTTPS connections.
- Add a Content-Security-Policy header to help reduce XSS and content injection risks.
- Add X-Content-Type-Options to reduce MIME-sniffing risks.
- Configure Referrer-Policy to control how referrer information is shared.
